Possum Labs

Legacy software is fragile. It doesn’t have to be.

Beyond Legacy

Software shaped your early success but its hindering your opportunities to win the future.

Customers expect more, in real-time, the competition offers no room for errors, and regulations and security concerns are constantly evolving.

Employees are confused, frustrated, and skimming job opportunities as they struggle to meet expectations.

Sound familiar? Too familiar?

We can you unlegacy your system.

The Possum Lab

We're an Enterprise SaaS platform tailor-made for organizations looking to secure, sustain, and scale — in short, to unlegacy your systems.

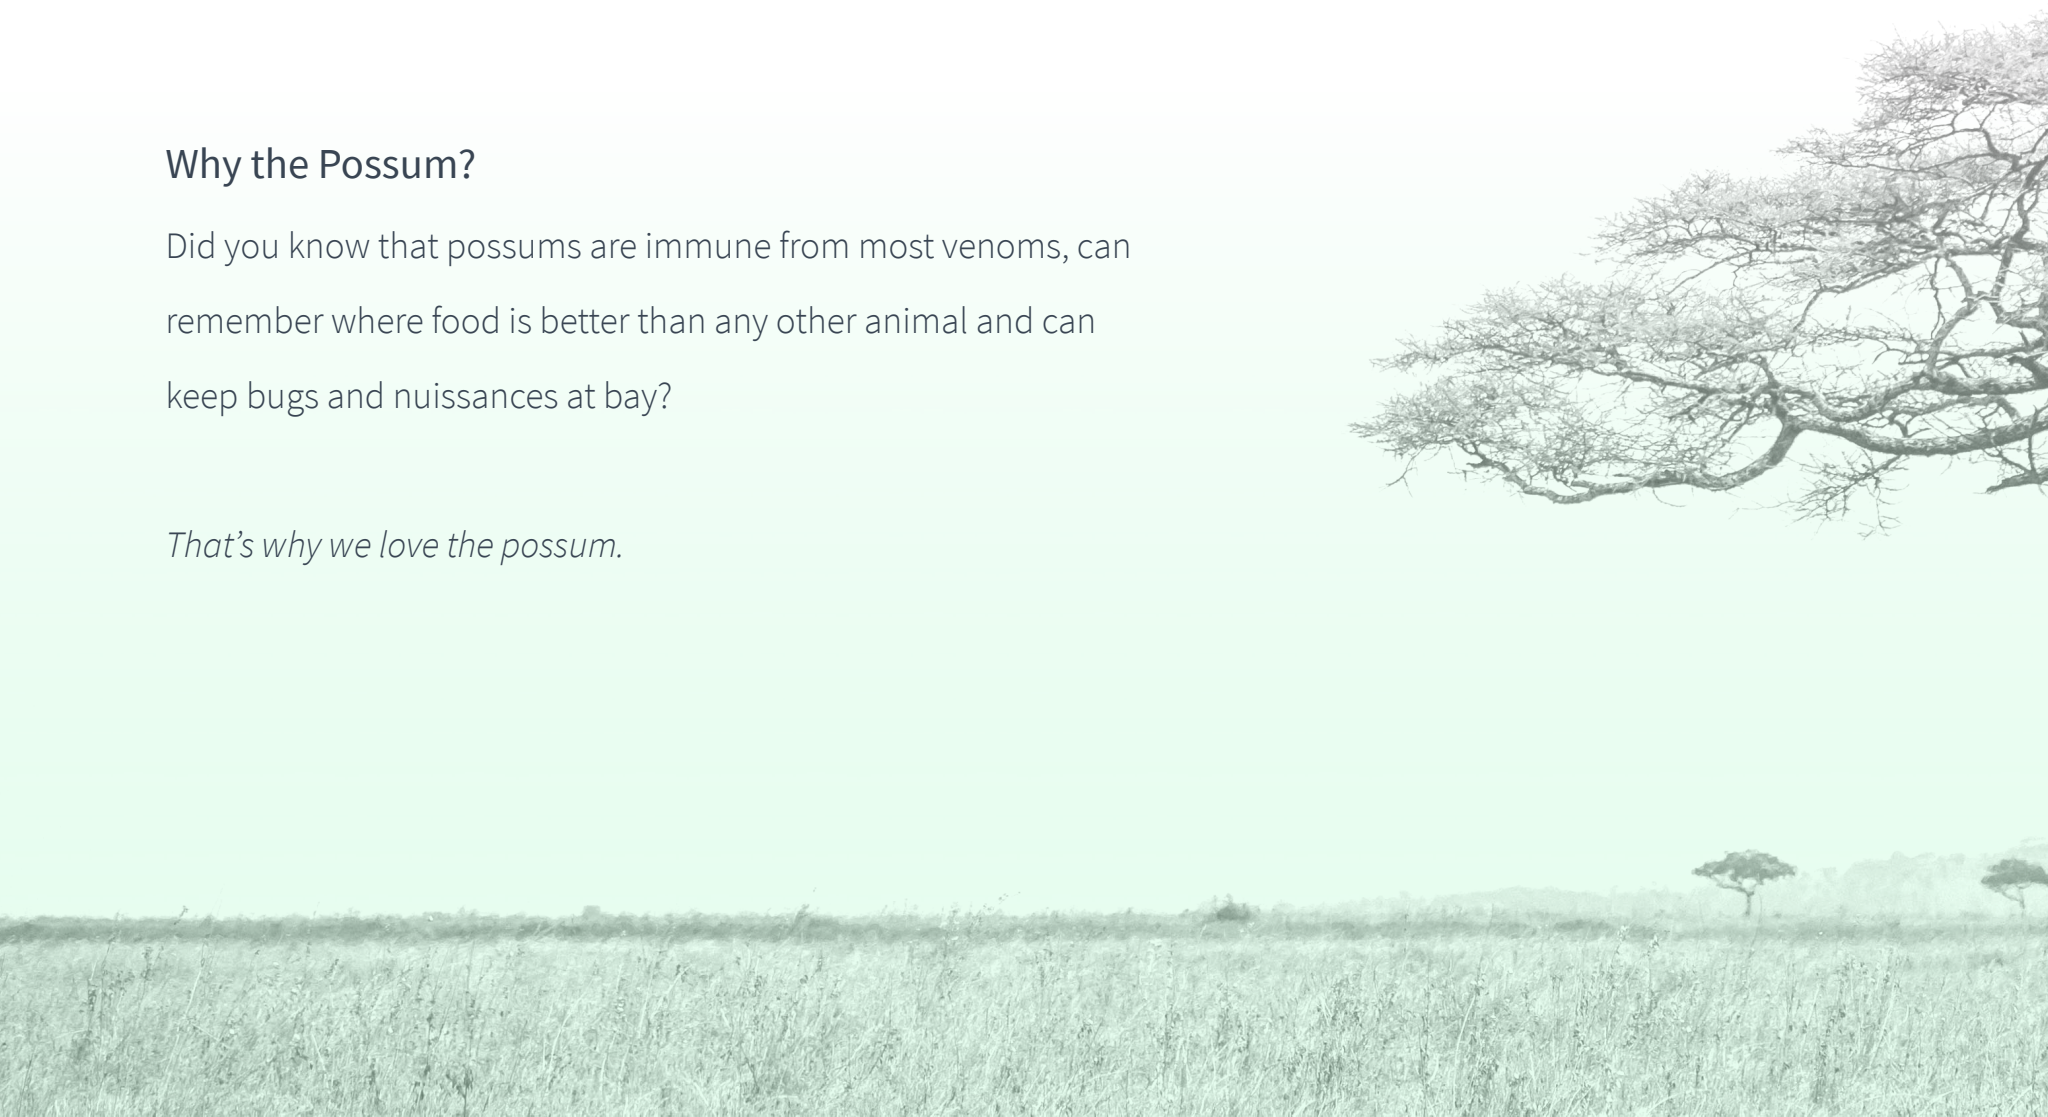
We help your organization capture, retain, and activate the institutional knowledge required to react at customer speed without unintended consequences.

Better yet, we'll futureproof your new innovations by unlocking the expertise and passion of every member of your organization.

Why the Possum?

Did you know that possums are immune from most venoms, can remember where food is better than any other animal and can keep bugs and nuissances at bay?

That's why we love the possum.



The Legacy Dilemma

Legacy systems are under pressure to evolve rapidly, despite the concerns and deliberations of administrators.

PRESSURE			PERIL
Frustrated employees and high turnover	→	**Assumptions** Presumptions regarding core functions & capabilities	→ Erosion of knowledge and wasted resources
Ever-changing customer expectations	→	**Awareness** Lack of visibility regarding the impact of code changes	→ Buggy software and customer churn
Onslaught of regulations and security threats	→	**Agility** Inability to respond to fast-changing environments & needs	→ Costly maintenance & prolonged exposure

The Possum Process

Possum Labs gives your business the confidence to move faster through discovery, automation and intelligence

Entity Dictionary
Auto-discovered objects & characteristics

Auto-Tests
Tests generated based on existing behavior

Workflows
Auto-discovered entity characteristic transitions
